Exercise

Current workout plan

Read in detail [here](#)

Monday			Tuesday	Wednesday			Thursday	Friday			Saturday	Sunday
Exercise	Sets	Reps	Rest Day	Exercise	Sets	Reps	Rest Day	Exercise	Sets	Reps	Rest Day	Rest Day
Squat (Barbell)	3	6		Deadlift (Barbell)	3	5		Walking Lunge (Dumbbell)	3	20		
Bench Press (Barbell)	3	8		Overhead Press (Barbell)	3	8		Incline Bench Press (Barbell)	3	8		
Overhead Grip Pull Up	3	8		Incline Chest-Supported Elbows-In Dumbbell Row	3	12		Cross-Body Cable Lat Pull-Around	3	10		
Dip	3	8		Leg Extension	3	12		Sideways Single Arm Machine Rear Delt Fly	3	12		
Standing Calf Raise	4	10		Chest Fly (Machine)	3	12		Seated Leg Curl	3	10		
Single Arm High Cable Lateral Raise	4	10		Hanging Knee Raise	3	12		Single Arm High Cable Lateral Raise	4	10		

Monday			Tuesday	Wednesday			Thursday	Friday			Saturday	Sunday
Cable Crunch	3	12		Overhead Triceps Extension (Cable)	3	12		Standing Calf Raise	4	10		
Single Arm Preacher Curl (Dumbbell)	3	10						Single Arm Bayesian Curl (Cable)	3	10		

Nutrition

Fiber

Read in detail [here](#)

Inulin

- [Inulin immunizes you to fructose and dramatically improves metabolic health](#)
 - Eat 10g/day of inulin to get the benefits, amount of food needed to reach 10g
 - Chicory root (Korzeń Cykorii) - 25-30g
 - Jerusalem artichoke (Słonecznik bulwiasty) - 60-70g
 - Garlic (Czosnek) - 4-5 cloves
 - Leeks (Por) - 100g
 - Asparagus (Szparagi) - 300-400g
 - Don't boil, instead roast or saute
- [High Inulin doses \(20g+/day\) can cause liver damage and inflammation.](#) Control following markers and stop/reduce inulin if you feel bad afterwards
 - ALT - liver damage
 - IL-6 - inflammation
 - TBF-β - inflammation
 - VEGF-A - inflammation

Arabinoxylan

- [Arabinoxylan causes a dose-dependent reduction in LDL-C cholesterol](#)
 - Eat 10-30g/day of arabinoxylan to get the benefits, amount of food needed to reach 10-30g:
 - Psyllium Husk Powder by Now Foods - 20-60g
- Control following markers to see if you are responding to arabinoxylan:
 - LDL - cholesterol

Vitamins & Minerals

Read in detail [here](#)

Vitamin A (Retinol (pl. Retinol))

- [Vitamin A](#) - TODO

Vitamin B1 (Thiamine (pl. Tiamina))

- [Vitamin B1](#) - TODO

Vitamin B2 (Riboflavin (pl. Ryboflawina))

- [Vitamin B2](#) - TODO

Vitamin B3 (Niacin (pl. Niacyna))

- [Vitamin B3](#) - TODO

Vitamin B5 (Pantothenic Acid (pl. Kwas pantotenowy))

- [Vitamin B5](#) - TODO

Vitamin B6 (Pyridoxine (pl. Pirydoksyna))

- [Vitamin B6](#) - TODO

Vitamin B7 (Biotin (pl. Biotyna))

- [Vitamin B7](#) - TODO

Vitamin B9 (Folate (pl. Foliany))

- [Vitamin B9](#) - TODO

Vitamin B12 (Cobalamin (pl. Kobalamina))

- [Vitamin B12](#) - TODO

Vitamin C (Ascorbic Acid (pl. Kwas askorbinowy))

- [Vitamin C](#) - TODO

Vitamin D

- [Correct doses and levels of vitamin D](#)
 - Take 20.000-30.000 IU/day of vitamin D until you reach healthy BF%, then take 10.000 IU/day
 - When you reach 80-90 ng/ml of vitamin D, keep taking maintenance doses (test blood and figure it out)

Vitamin E (Tocopherol (pl. Tokoferol))

- [Vitamin E](#) - TODO

Vitamin K

- [Vitamin K](#) - TODO ===== Calcium (pl. Wapń)
- [Calcium](#) - TODO

Iron (pl. Żelazo)

- [Iron](#) - TODO

Magnesium (pl. Magnez)

- [Magnesium](#) - TODO

Phosphorus (pl. Fosfor)

- [Phosphorus](#) - TODO

Potassium (pl. Potas)

- [Potassium](#) - TODO

Sodium (pl. Sód)

- [Sodium](#) - TODO

Zinc (pl. Cynk)

- [Zinc](#) - TODO

Copper (pl. Miedź)

- [Copper](#) - TODO

Manganese (pl. Mangan)

- [Manganese](#) - TODO

Chromium (pl. Chrom)

- [Chromium](#) - TODO

Molybdenum (pl. Molibden)

- [Molybdenum](#) - TODO

Selenium (pl. Selen)

- [Selenium](#) - TODO

Iodine (pl. Jod)

- [Iodine](#) - TODO

Fluoride (pl. Fluorek)

Bloodwork

Read in detail [here](#)

Fundamental bloodwork markers to track

- Complete blood count with differential (pl. pełna morfologia z rozmazem)
- Fasting glucose (pl. glukoza na czczo)
- Fasting insulin (pl. insulina na czczo)
- Complete lipid profile (pl. pełny profil lipidowy)
 - Lp(a)
 - ApoB
 - ApoA1
- Liver panel (pl. panel wątrobowy)
 - ALAT
 - ASPAT

- Bilirubin (pl. bilirubina)
- Alkaline phosphatase (pl. fosfataza zasadowa)
- Thyroid panel (pl. panel tarczycowy)
 - T4
 - T3
 - TSH
- Electrolytes (pl. elektrolity)
 - Potassium (pl. potas)
 - Magnesium (pl. magnez)
 - Sodium (pl. sód)
 - Calcium (pl. wapń)
 - Chloride (pl. chlor)
- Ferritin (pl. ferrytyna)
- Homocysteine (pl. homocysteina)
- Vitamin D25 OH (pl. witamina D25 OH)
- CRP (pl. białko C-reaktywne) - inflammation marker
- HbA1c (pl. hemoglobina glikowana)
- Uric acid (pl. kwas moczowy)
- Creatinine (pl. kreatynina)

Optimal levels

Vitamin D

- 80-90 ng/ml but 60-90 ng/ml is fine [1](#) [2](#)

Fasting glucose

- 70-99 mg/dl [1](#)

Ferritin

- 15-400 ug/dl for men [1](#)
- 10-200 ug/dl for women [1](#)
- Somewhere in the middle is best

Homocysteine

- 5-9 umol/l [1](#)

YouTube Channels
